# CONFORMABLE ANTI-SLIP SAFETY FLOOR MARKING LINE 150X610 MM – YELLOW/BLACK

**Irregular floors now have their dedicated floor marking solution! Here is a special floor marking strip that conforms to all types of surfaces and shapes.**

## Product description:

- Adhesive safety floor marking strip.
- Medium grain anti-slip coating on an aluminium base.
- Safety colour yellow/black.
- In width 150 mm.

## Unique selling points:

- Extra strong adhesive.
- Moulds to the shape and irregularities of the surface to which it is applied: the aluminium base reduces the risk of the material lifting.
- The aluminium base has no memory and can be placed in any desired shape.
- Its zero tolerance to stretching ensures that once placed on an uneven surface the tape does not lift, unlike a plastic that stretches and always tries to return to its original state.
- Abrasive with a high level of adhesion, effective even in wet or dirty conditions: slip resistance R13 according to DIN 51130.
- Suitable for the passage of pedestrians and machines.
- Resistant to water and cleaning agents.
- Resistant to temperatures ranging from -30°C to +160°C.
- High level of flame retardancy thanks to its aluminium base: certified to CAA FAA specification 8 for use in aircraft cockpits.
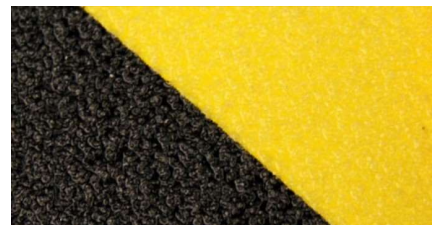

## Usage:

- For indoor and outdoor use.
- Can be used in any business, factory, warehouse, campus, etc.
- For marking surfaces that require extra slip resistance.
- Ideal for all uneven surfaces such as worn floors, stairs made of perforated or ribbed sheet metal, Durbar plates, walkways; or for covering the edges of steps and loading docks or vehicle steps, etc.

## Technical characteristics:

- Total thickness approx. 900 μ.
- 75 μ aluminium foil coated with coloured resin inlaid with aluminium oxide crystals.
- Acrylic permanent adhesive.
- Dimensions: 150 x 610 mm.
- Application instructions: tarifold.com/downloads/instructions

## Packaging:

- 1 unit per bag with EAN label and application sheet.
- 5 bags per white box.
